

Part No: White frame: BVG-HMW-0281
Black Frame: BVG-HMB-0281

The new PROTECT HM-0281 series Laser goggles are lightweight laser protection eyewear made from special plastics; they are a perfect solution to wear over prescription glasses and the design offers a large field of vision. The temples can be adjusted individually in length and angle and the soft rubberized face foam provides the wearer with enhanced comfort.

The Laser Safety Filter type: BV0281 is suitable in particular for Holmium, Erbium and CO2 lasers used in medical surgery, but covers additional wavelength as well. The laser safety filter consists of a light grey coloured polycarbonate lens, and offers visible light transmission (VLT) of more than 56%. The laser safety filter is CE certified in accordance with the requirements of EN207.
